Backup from Database

Step 1: Select the Data Source

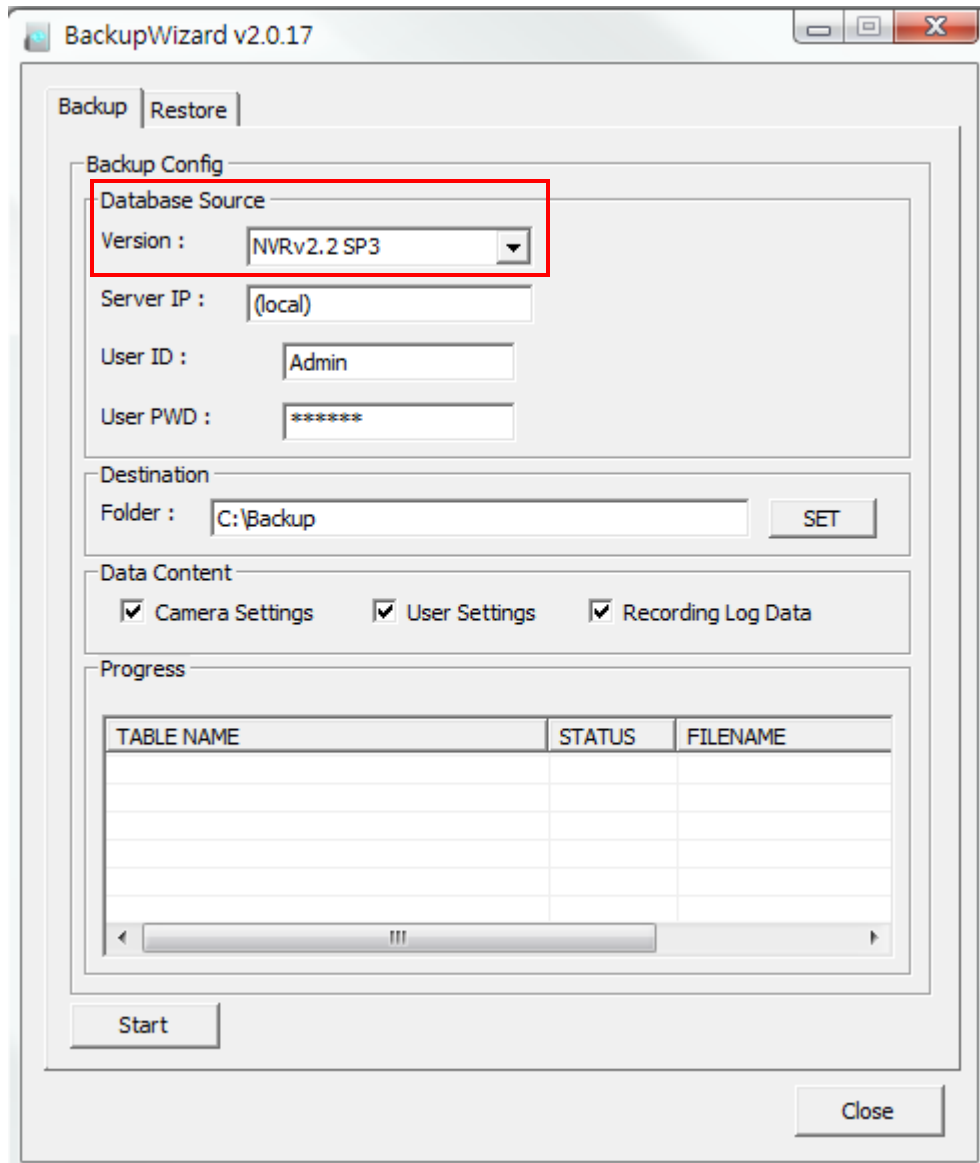

1. Select application that you want to backup.

The screenshot shows the BackupWizard v2.0.17 application window. The 'Backup' tab is selected and highlighted with a red box. The interface is divided into several sections:

- Backup Config:**
 - Database Source:**
 - Version: NVRv2.2 SP3 (dropdown menu)
 - Server IP: (local) (text field)
 - User ID: Admin (text field)
 - User PWD: ***** (password field)
 - Destination:**
 - Folder: C:\Backup (text field) with a SET button.
 - Data Content:**
 - Camera Settings:
 - User Settings:
 - Recording Log Data:
 - Progress:**
 - A table with columns: TABLE NAME, STATUS, FILENAME.
 - The table is currently empty.
- Buttons:** Start (bottom left) and Close (bottom right).

2. Select version that you want to backup.

3. Type Database Server IP Address, Account, Password.

The screenshot shows the 'BackupWizard v2.0.17' application window with the 'Backup' tab selected. The 'Backup Config' section is expanded, showing the following fields:

- Version : NVRv2.2 SP3
- Server IP : (local)
- User ID : Admin
- User PWD : *****

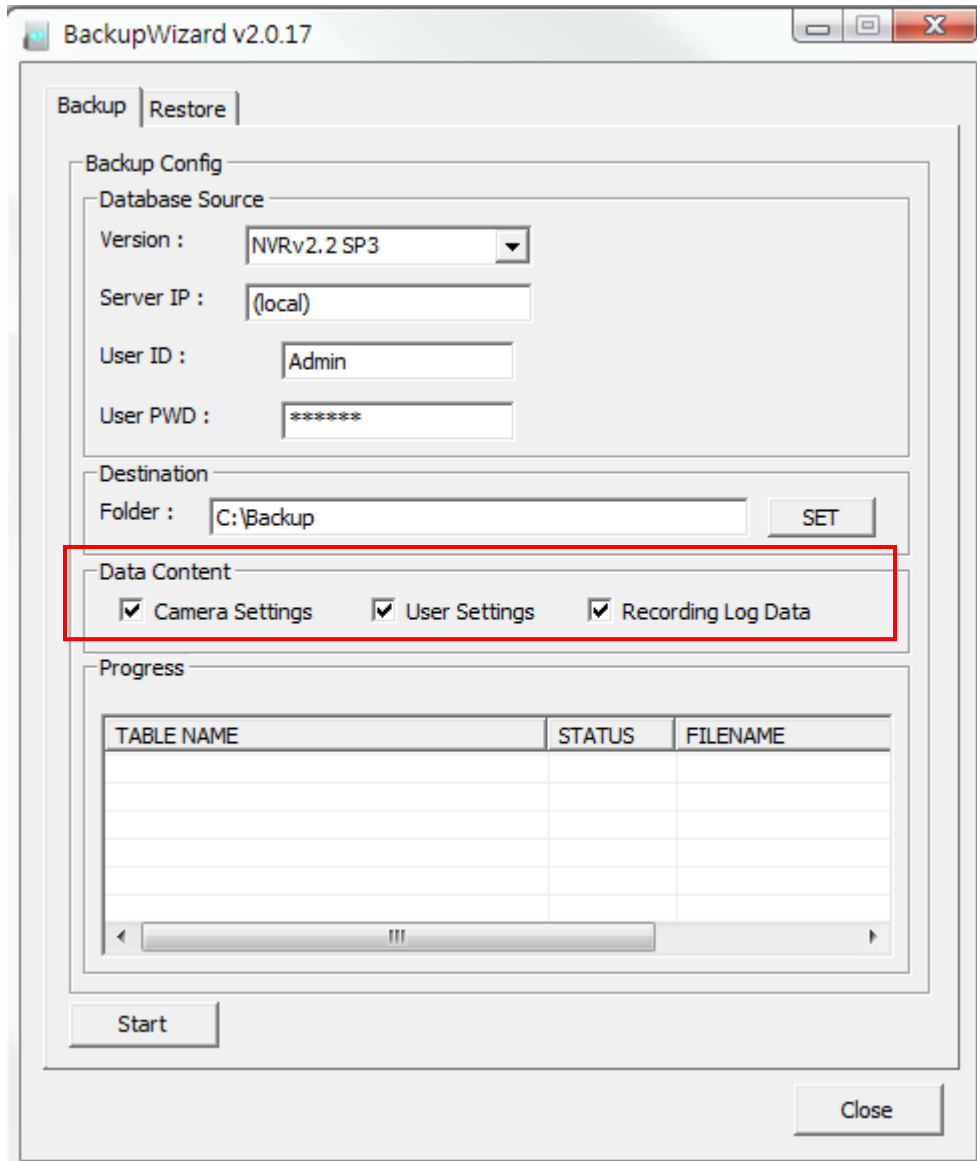

The 'Destination' section shows the folder path 'C:\Backup' with a 'SET' button. The 'Data Content' section has three checked checkboxes: 'Camera Settings', 'User Settings', and 'Recording Log Data'. The 'Progress' section contains a table with the following structure:

TABLE NAME	STATUS	FILENAME

At the bottom of the window, there are 'Start' and 'Close' buttons.

Step 2: Choose the data Content you want to backup:

1. Click checkbox to select content :

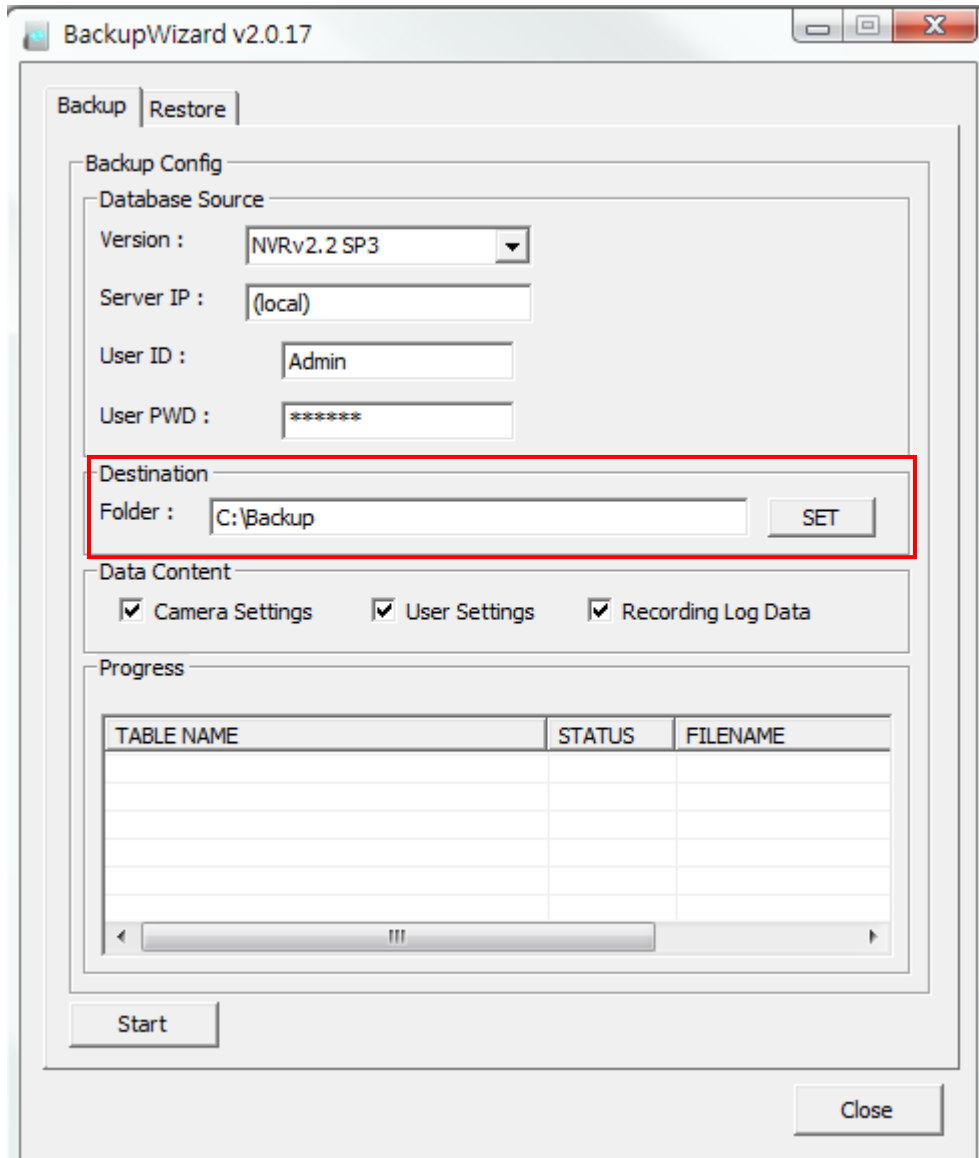

The screenshot shows the BackupWizard v2.0.17 application window. The 'Backup' tab is selected. The 'Backup Config' section includes fields for Database Source (Version: NVRv2.2 SP3, Server IP: (local), User ID: Admin, User PWD: *****), Destination (Folder: C:\Backup), and Data Content. The Data Content section is highlighted with a red box and contains three checked checkboxes: Camera Settings, User Settings, and Recording Log Data. Below this is a Progress section with a table and a Start button.

TABLE NAME	STATUS	FILENAME

Step 3: Type a path to backup file:

1. Click checkbox to select content :

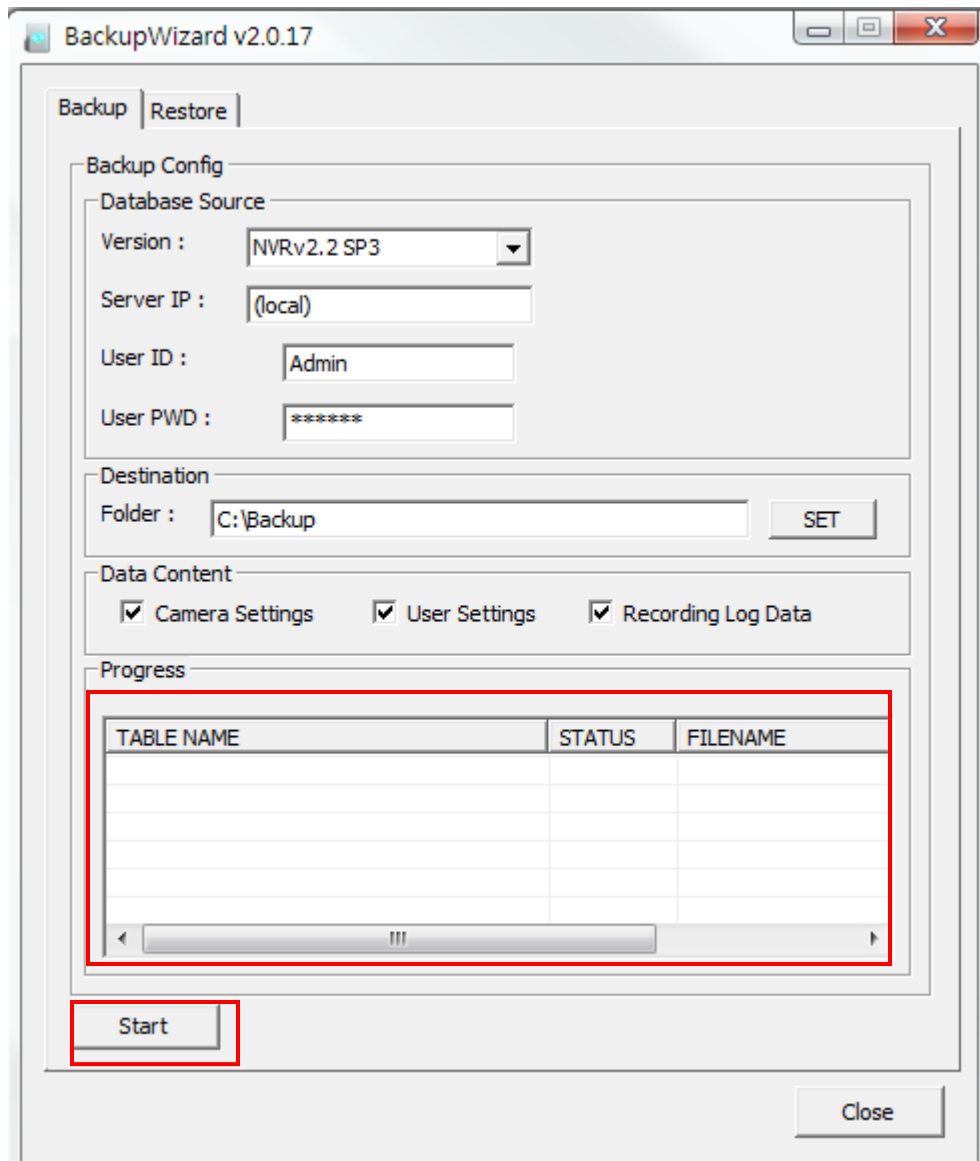

The screenshot shows the BackupWizard v2.0.17 application window. The 'Backup' tab is selected. The 'Backup Config' section includes fields for 'Database Source' (Version: NVRv2.2 SP3, Server IP: (local), User ID: Admin, User PWD: *****), 'Destination' (Folder: C:\Backup, with a 'SET' button), and 'Data Content' (checked for Camera Settings, User Settings, and Recording Log Data). A 'Progress' section contains an empty table with columns 'TABLE NAME', 'STATUS', and 'FILENAME'. 'Start' and 'Close' buttons are at the bottom.

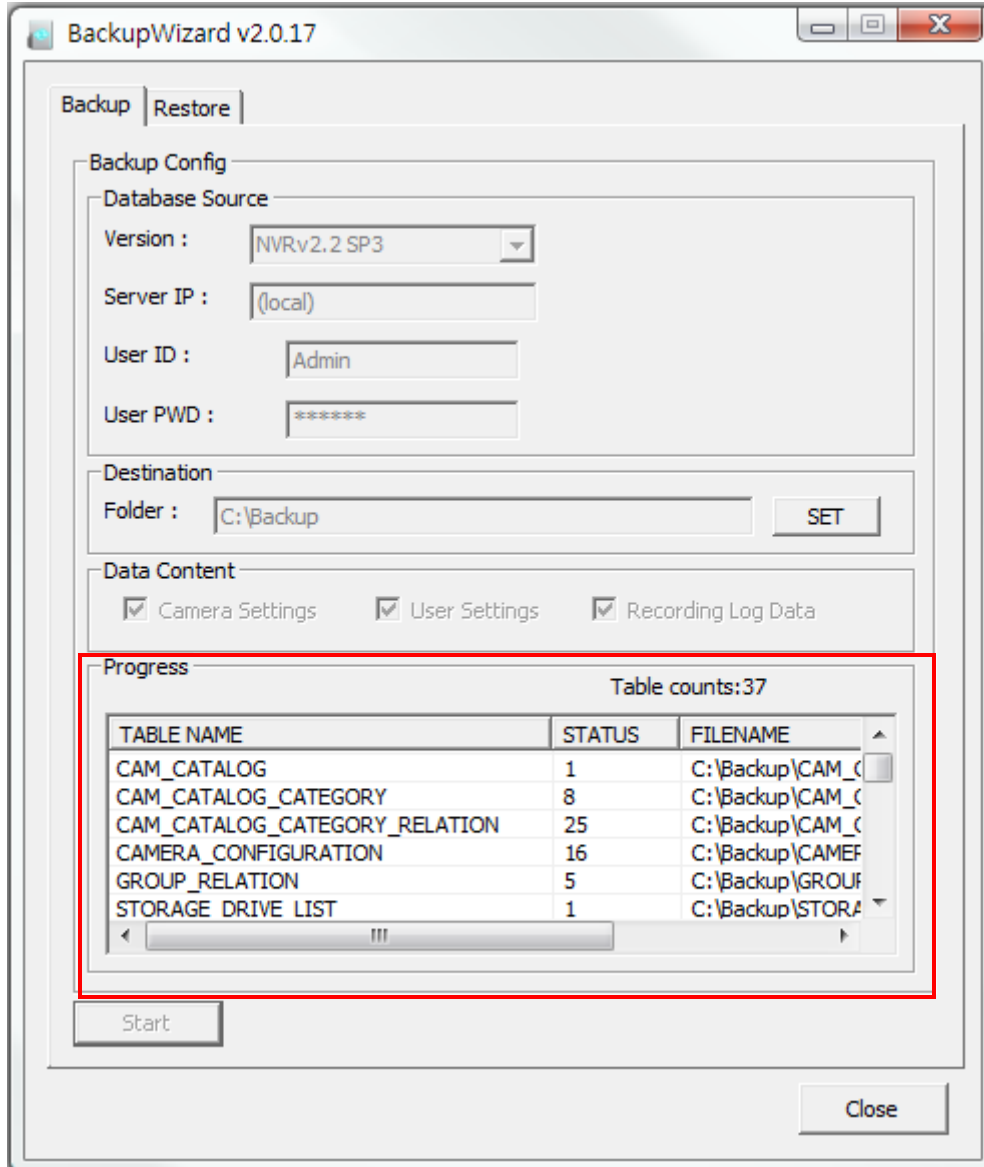

TABLE NAME	STATUS	FILENAME

Step 4: Click Backup Button to backup file:

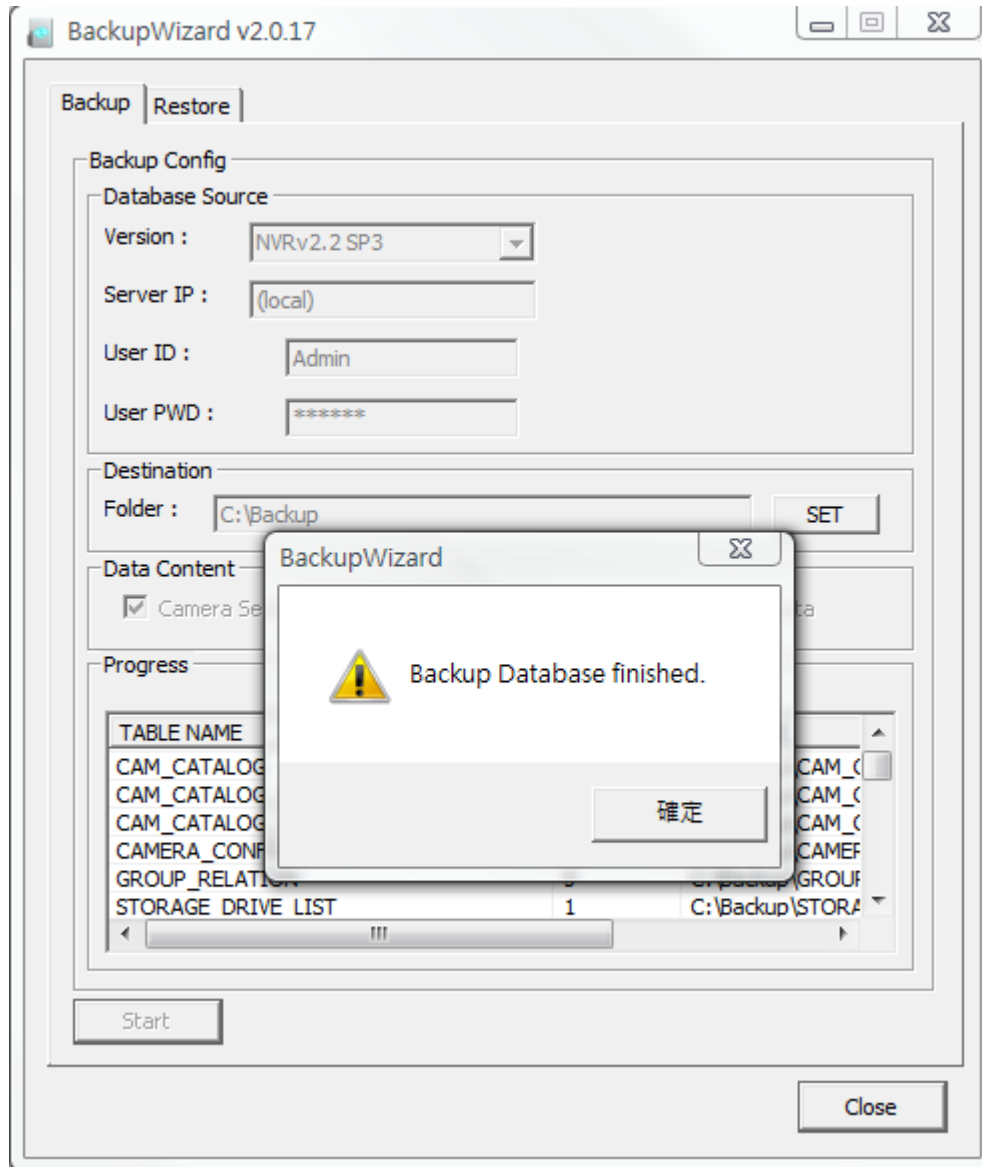

1. Click Backup Button To Start Backup :

2. List will show current status :

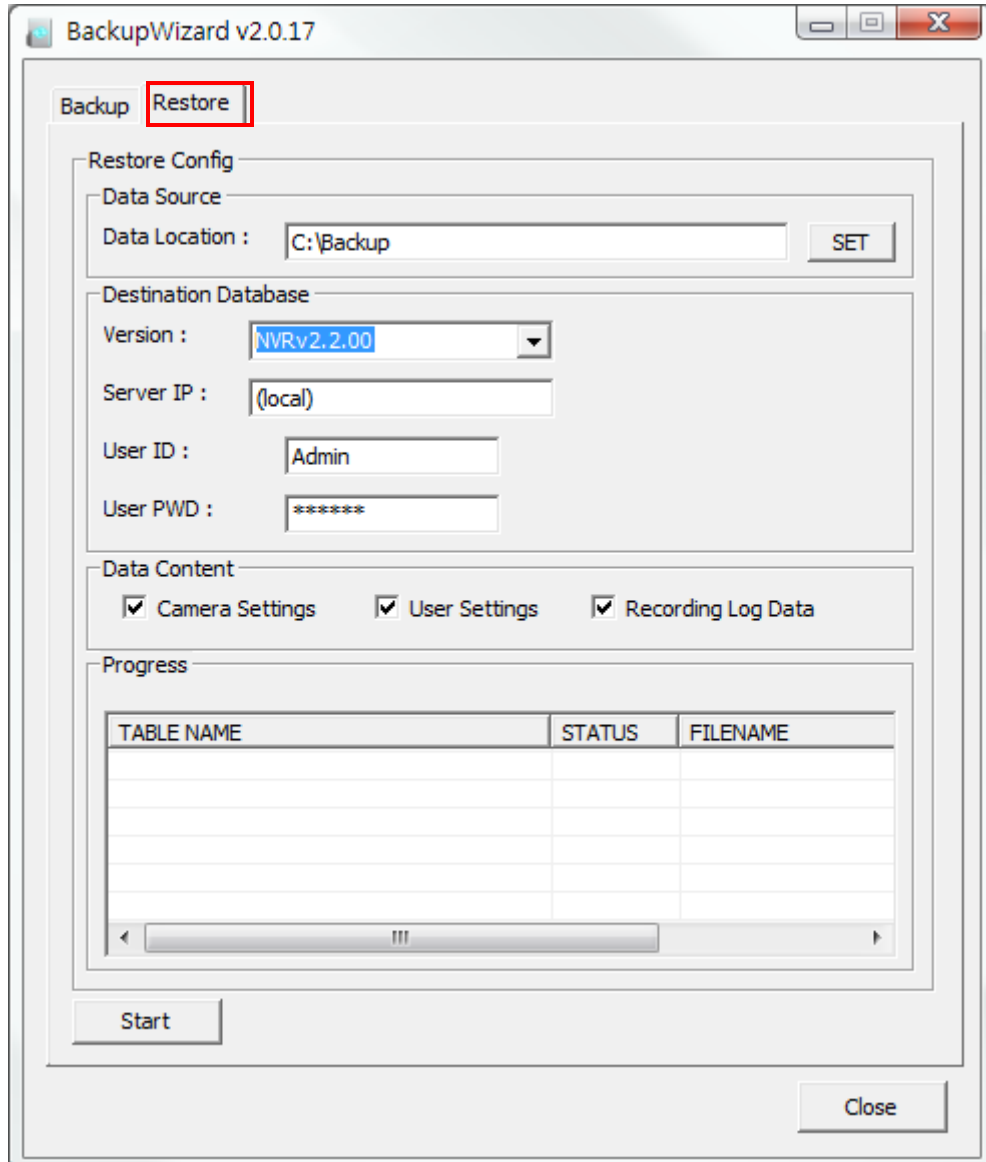

Step 5: Backup Successfully:

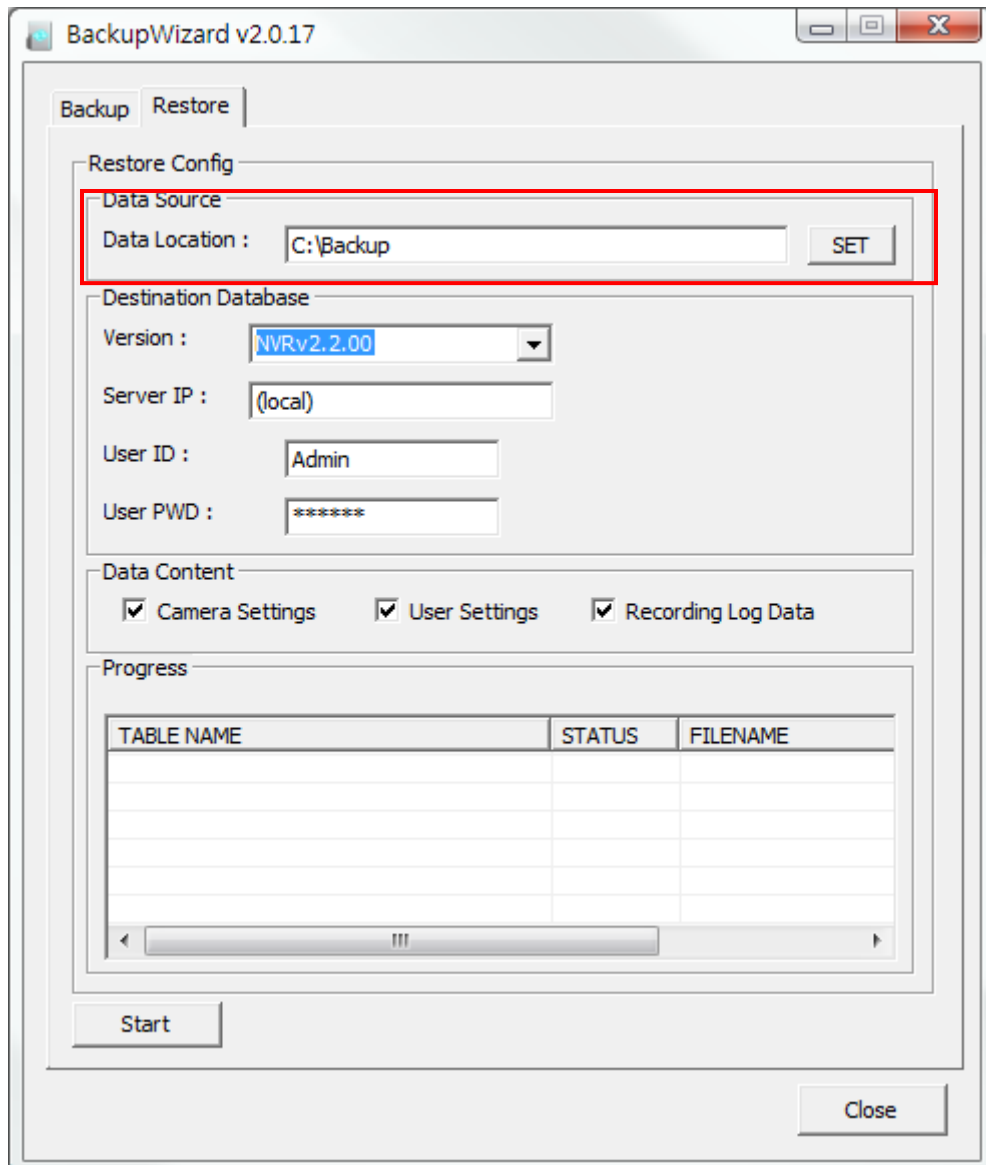

Restore to Database

Step 1: Click label to switch to restore function

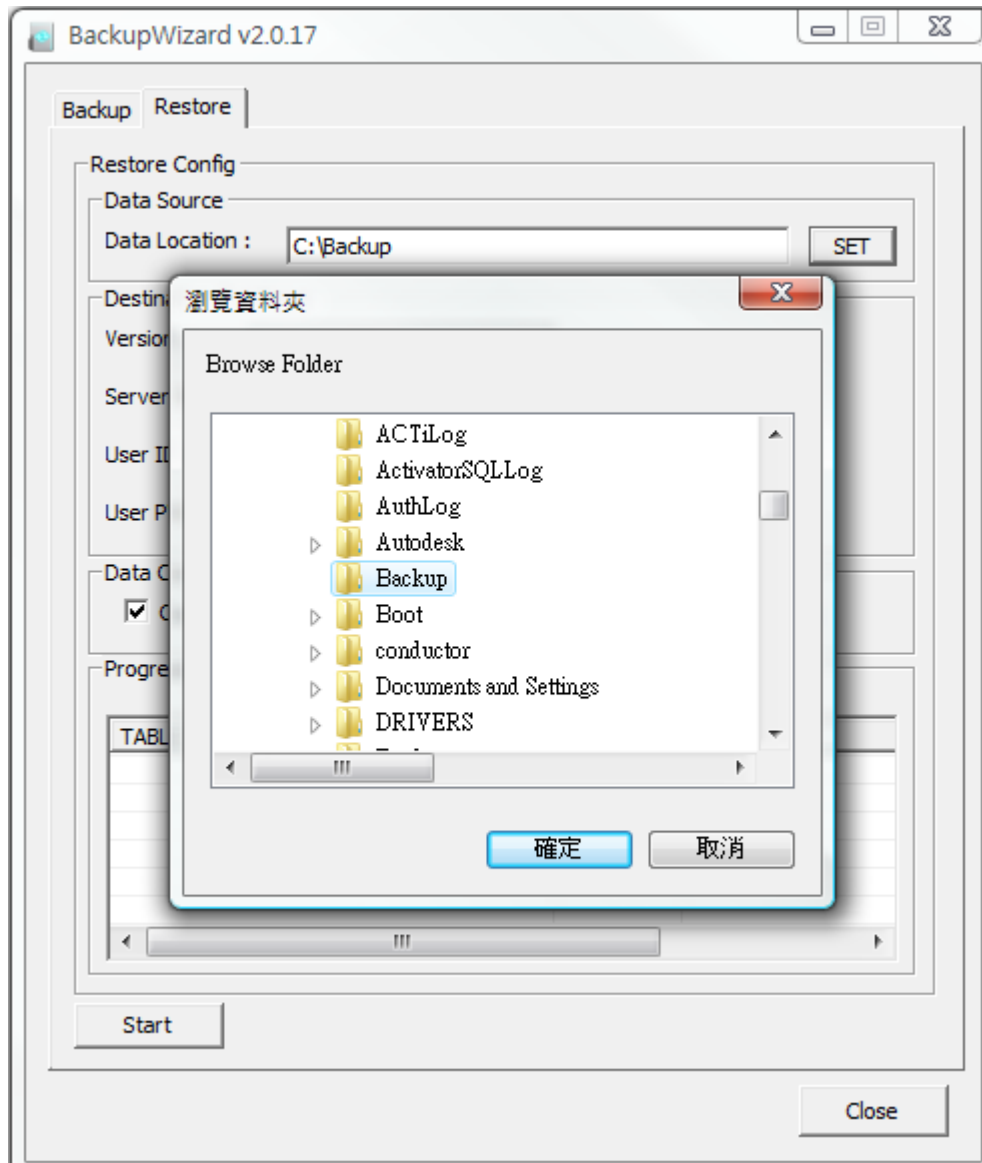

Step 2: Choose the data Source you want to restore:

1. Click to select data location

2. Click SET button to open folder

Step 3: Choose the data Content you want to restore:

The screenshot shows the 'BackupWizard v2.0.17' application window with the 'Restore' tab selected. The 'Restore Config' section contains the following fields:

- Data Source:** Data Location: C:\Backup (with a SET button)
- Destination Database:** Version: NVRv2.2.00 (dropdown), Server IP: (local), User ID: Admin, User PWD: *****
- Data Content:** (highlighted with a red box) Camera Settings, User Settings, Recording Log Data
- Progress:** A table with columns TABLE NAME, STATUS, and FILENAME.

Buttons for 'Start' and 'Close' are located at the bottom of the window.

TABLE NAME	STATUS	FILENAME

Step 4: Choose Restore to target:

1. Select application version and type the server IP.

Note: If you wish to restore to NVR 2.2 SP2, please select NVR v 2.2.00.

For NVR 2.2 SP3, please select NVR v 2.2 SP3
