

## Multi-site

### Solution Template

Site	Application Name	Function
Camera Site	NVR Server	Local Recording
Remote Monitoring	NVR Web Client	Live Preview
		Playback
		PTZ control
Control Center	NVR Workstation	Live Preview
		Playback
		PTZ control
		e-Map
	NVR Server	Recording

### Benefit

- Local & Remote Recording
- Multiple site recording backup
- Remote real-time preview through IE browser

### Deployment Example - Community Surveillance

For camera recording, the NVR software can be installed at camera site and control center to support the local recording and remote recording. Multiple NVR can backup each other to make sure all recording files well managed and protected. In addition to the recording feature, the NVR Workstation also supports the remote preview, record and playback. To support the easy remote previewing, NVR Web Client offers an easy solution that customer can use whatever PC with Browser to access to the camera anytime, anywhere.
