

ACTi Provides IP Converged Solution to Enhance Turkey Building Security Surveillance System

To solve distance problem and to save installation cost, EDS, the Turkey-based solution provider, decided to choose most advanced IP based CCTV systems, ACTi video server plus with Transcoder to enhance Turkey building security surveillance system.

This building surveillance project uses 14 pairs of video server (SED-2100R) and Transcoder (SED-3200) for solving connection problem. Since the security guards are used to operate the original DVR system or to use control panel to control PTZ camera. However, there are totally 7 camera installation

sites. The distance between each camera installation site and control center is around 140M. It would be highly difficult to install coaxial cable. Furthermore, because of the existed network system, IP transmitting method would be the best solution for this project. Each channel only needs 3Mbps and transmits through internet. But the video quality is the same as analog system.

EDS quoted “Before we decided to use ACTi products for this project, we had examined at least 5 different companies’ encoders and decoders. ACTi products are really qualified and can get the leadership in Turkey security market.”

About ACTi

ACTi is the leading product developer and manufacturer of MPEG-4 IP surveillance product solutions. ACTi is able to deliver MPEG-4 ASP compliant video streams at Full D1 resolution and 30/25 frames per second. ACTi offers the most complete IP CCTV product line and provides one-stop-shopping convenience for IP surveillance
